iPhone SDK

December 1 - 4, 2009 in Long Beach, CA

Learn how to create full-features iPhone applications from two experienced iPhone developers in this 4-day, hands-on course. You'll come away from this Studio ready to create your first iPhone app, or improve upon your existing application. We also offer private, on-site courses.

*"It was totally awesome! I learned more in these four days
than in six months of muddling around on my own."*

- Will Ronco

Mastering Ruby and Rails

December 1 - 4, 2009 in Long Beach, CA

Learn advanced Ruby and Rails techniques the pros use to make your code more powerful and compact. You'll come away from this Studio feeling like a Ruby and Rails Master with a deeper understanding of these powerful technologies. We also offer private, on-site courses.

*"I highly recommend attending this Studio to anyone
interested in Rails development...They really know their stuff
and have real world examples of what was easy and where
they ran into pitfalls." - Sean Mountcastle*
